General Order 7

Date: February 5, 2009

To: All Train Service Personnel

Subject: Train Operations Monday through Friday

The track department has the entire railroad until further notice. Hrail vehicles can operate on the track without train orders or track warrants. Work trains will need train orders to leave the yard. Before train orders are issued the dispatcher must contact the track department and notify them of any train movement.

Dispatchers are not unless train operations are necessary.

In the event that train operations are necessary during the time that the railroad is turned over to the track department, a dispatcher will be scheduled for that day of train operations. Once the dispatcher signs in for duty, the dispatcher will ascertain where the track department is and will then issue the appropriate train orders and track warrants to both the track department and the train that is to be operated.

Mark S. Bassett
Chief Operating Officer
Nevada Northern Railway

William Allen
Trainmaster
Nevada Northern Railway
